Summary

Unity Game Developer with around 9 years of experience shipping mobile games, serious games, AR/VR experiences and interactive 3D applications. Comfortable across the full development cycle, from gameplay programming to game design support, on Android, iOS, WebGL and standalone VR. Two educational mobile games (Natura Prenestina, Archeo Spoletino) currently live on the App Store and Google Play.

Professional Experience

Lead Unity & Backend Developer

February 2022 – Present

Movie Logic, Rome

- Sole Unity developer of **Natura Prenestina**, an educational mobile game on the biodiversity of the Prenestini Mountains. Two gameplay modes (free Exploration and timed Challenge), 3D environments, smooth touch controls. Shipped on **App Store and Google Play**. Also contributed to game design.
- Unity development of **Archeo Spoletino**, a serious game on archaeology for the Municipality of Civitella d'Agliano. Players reassemble damaged artefacts through progressively harder puzzles, each unlocking historical context. Shipped on **App Store and Google Play**.
- Unity development of 3 Android and iOS tourism apps for the **Ecomic** program of the **Italian Ministry of Culture**, featuring AR experiences (video AR and 3D AR objects) for on-site cultural visits. Project ongoing, under NDA.
- Full-stack development of **Spectra**, a platform for interactive films and 3D WebGL galleries: React frontend and ASP.NET Core backend. Major update currently in progress.
- Mobile app and backend for **Itinero**, a tourism platform live on the App Store and Google Play since 2023. Backend in ASP.NET Core / PostgreSQL.

Unity VR Developer (contract)

September 2025 – December 2025

Idego, Rome

- Developed an Oculus VR application simulating in-home patient interventions for healthcare training.
- Built the synchronisation layer between the animation system and gameplay events, plus an interactive question-and-answer system with structured response reporting.

Freelance Unity Developer

March 2023 – August 2024

Digimax, Rome

- Endless runner mobile game developed as movie tie-in promotion (project later put on hold).
- Interactive WebGL diorama for the **Royal Palace of Caserta**, built in Unity.
- VR experience for Oculus dedicated to the **Royal Palace of Caserta**.

Mid / Senior Unity Developer

November 2019 – November 2021

KeyBiz Srl, Rome

- Built in Unity a real-time interactive 3D monitoring system for the **Trenitalia** high-speed train fleet, deployed on touch tables in the central control room. Three-tier interactive UI: nationwide georeferenced map, real-time diagnostics dashboard, 3D Digital Twin for malfunction visualisation.
- Other interactive 3D applications in Unity for enterprise clients including **Telecom** and the defense sector, deployed on touch tables.

Junior Unity Developer

August 2016 – October 2019

Ambiens VR, Rome

- VR applications for **Oculus**, **Valve Index/HTC Vive** and Android.
- Cross-platform AR app for Android and iOS.
- Custom Unity plugins for **Revit** and **SketchUp**, and Unity-based applications for architecture studios.
- Custom C# DLLs for reusable internal libraries.

Personal & Indie Projects

Dickens — multiplayer horror escape game

Solo developer

- Co-op and PvP multiplayer horror set in a procedurally generated dungeon. Players escape a labyrinth full of monsters while finding gadgets that trigger interactions between monsters and players, and between players themselves.
- Designed and implemented the procedural dungeon generation algorithm.
- Networking on Unity **Netcode for GameObjects**, with a custom Rigidbody synchronisation component to keep physics smooth across host and clients.
- Wrote a custom Unity plugin to bake and persist **lightmaps onto prefabs** — functionality not available out of the box in Unity.
- Sole developer (programming, systems, gameplay). Project paused due to lack of dedicated art and animation.

Technical Skills

Engine & languages: Unity, C#, JavaScript / TypeScript

Game / XR: gameplay programming, 3D, WebGL, mobile AR (AR Foundation), VR (Oculus, HTC Vive, Valve Index), touch UI

Platforms: Android, iOS, Web, Standalone VR, Touch Tables

Other: ASP.NET Core, PostgreSQL, Clean Architecture, CQRS, React

Languages

Italian — Native

English — C1 (Full working proficiency, self-assessed)

Education

Technical High School Diploma — Industrial Engineering

2016

I.T.I.S. Enrico Fermi, Rome

Interests

Video games, personal Unity projects, fitness.
